

AREAS OF EXPERTISE

DISTINCTIVE COMPETENCES

- **Business Law / Company Law**

We advise on incorporation of enterprises, restructuring, merger & acquisition (due diligence) and successor establishment and carry out all transactions, from contract drafting to coordinating and filing in the business register. In addition, we structure your investment and bring together private equity / mezzanine capital and innovative projects (shareholding, project financing, development of real estate, etc). We hold and manage domestic and foreign shares and assets on behalf of our clients and provide the trustor with all necessary support to ongoing servicing the trustor effectively with a specialized trust company. Moreover, we schedule and prepare general assemblies and shareholders meetings, draft all relevant (international) business contracts, enforce claims in court and arbitration proceedings (and put them down respectively) and optimize the claim management of companies. Last but not least we review the observation of legal provisions (legal compliance).

- **Real Estate Transactions**

We draft real agreements (eg purchase contracts, deeds of donation, lease-, condominium- and building contracts, etc), check the land registry, calculate and discharge all kinds of tax, act as an escrow agent, both for the contracting parties as well as for credit institutions, provide security for the contracting parties and execute the transaction with the land register. We have structured renowned international real estate projects and are – as registered escrow agents – member of the “Treuhandrevision”.

- **Protection of Investors**

Over the last years we have engaged ourselves in issues regarding banking and equity market law intensively as well as compensation of investors and represent thousands of “cheated investors” in numerous court litigations (primarily because they have invested in different financials based on misscounseling as well as because of failure to financial supervise properly, incorrect certificates given by auditing firms, inaccurate ratings, etc).

We are experienced litigation lawyers in respect of enforcement and clearance of claims, especially with breach of contract, anticompetitive practices, medical malpractice, professional liability, damages for pain and suffering, etc.

- **Data Protection / IT-Law and E-Commerce**

We review the current situation (audit), especially regarding the implementation of the general data protection regulation, suggest reasonable provisions and establish a data protection management system, instruct internal data security officers and take over the function of an external data security officer.

Online-Law of all nature, blockchain-technology, etc are not the future but the benchmark of our times – we do not only understand the legal complexity but also the technological background.

USP

- We are **entrepreneurs ourselves** (and manage several independent enterprises) and therefore understand the concerns of entrepreneurs. We know what is relevant in daily business, we think entrepreneurial and advice and support preventative.
- **one-stop-shop:** With the presence of our academic and business consultants plus the interdisciplinary cooperation with economical advisers, management consultants, chartered accountants, notaries and financing-experts we are able to offer comprehensive solutions for extensive projects (one-stop-shop) – however, the contract responsibility remains with “LIKAR Law Offices”.
- **English (Business) Contracts** – in a globalized world as a matter of course we draft and negotiate all contracts in English.

ATTORNEYS AT LAW EQUITY PARTNERS
